PROFESSIONAL SUMMARY

Product professional with 8+ years in airline/fintech technology, including 6+ years onsite with Japanese clients. Led an airline e-commerce product from requirements to launch (+20% online bookings), then moved into platform ownership to apply product thinking to developer tooling, driving the CloudBees CI migration for 100+ developers. Targeting Technical / Platform Product roles.

PROJECTS

RAG-Based Platform Assistant for Platform Engineers | Portfolio link

Authored a PRD for an AI assistant that unifies Jira, ServiceNow, Confluence and vendor docs, targeting the 3-4 hours per week platform engineers lose to searching. Specified the RAG architecture, evaluation set, success metrics and guardrails.

Zomato Hygiene Trust Case Study |Portfolio link

Surveyed 31 working professionals and found hygiene uncertainty to be the top barrier to ordering (90% of respondents), then prioritised solutions using RICE. Designed a Hygiene Score and Review Summary prototype with defined success metrics.

WORK EXPERIENCE

Xoriant Solutions Pvt. Ltd **Pune, MH**

Senior Software Engineer | Platform Owner, CI/CD & DevOps Tooling *Dec'2024- present*

- Drove Jenkins OSS to CloudBees CI migration for 100+ developers across 5+ teams: gathered requirements, defined the onboarding model, and phased the rollout into a standardised CI/CD platform. Result: all 30+ pipelines migrated in 2 months.
- Cut weekly tool downtime incidents by ~70% by running root cause analysis on 200+ incidents across DevOps tools supporting fintech applications and fixing the recurring infrastructure gaps disrupting daily work for developers across 6 fintech teams.
- Automated upgrades and patch deployments across 8+ DevOps tools using Jenkins pipelines, cutting patch cycle time by 60%, saving 3 hours of manual effort per cycle, and removing planned downtime for 100+ developers.
- Identified 2-3 hour incident investigations as a productivity drain; proposed a RAG-based Platform Assistant (PRD completed), selected in the organisation's ideathon.
- Owned day-to-day operation of 8+ enterprise DevOps tools and Docker-based deployments for 50+ microservices on AWS, handling 50+ support requests per month.

Tata Consultancy Services **Tokyo, Japan**

Senior Business Analyst - Airline *Oct'2019- Nov'2024*

- Led a 10-member BA team to deliver airline e-commerce web and mobile applications for domestic markets, owning requirements, scope, and releases end to end and driving a 20% increase in online bookings in year one.
- Ran requirements workshops with 10+ business stakeholders and prioritised features by business value and delivery effort, translating them into BRDs, user stories and wireframes for the booking and post-booking platform.
- Designed API specifications for 40+ microservices across reservation systems and third-party services, defining reusable REST/SOAP contracts that drove 20% API reuse and cut duplicate integration work.
- Managed backlog grooming and sprint planning across 35+ sprints with development and QA teams, delivering 12 production releases on schedule.

Tata Consultancy Services **Tokyo, Japan**

QA Analyst *Oct'2018- Sep'2019*

- Contributed to the Self Bag Drop rollout for Japan Airlines' domestic market: interviewed passengers on-site to find usability issues and worked with cross-functional teams to fix them, reducing bag check-in time to 40 seconds.
- Validated change requests across airline departure control system modules and supported interline testing with partner airlines.

SKILLS

Product: PRD Writing, Backlog Management, Feature Prioritization, Stakeholder Management, Requirements Gathering, User Research, Product Metrics, Competitor Analysis, Wireframing, Agile / Scrum

Tools: Jira, Confluence, ServiceNow, Bitbucket, Jenkins, CloudBees CI, AWS, Docker, Postman, SoapUI, Dynatrace, REST/SOAP APIs

Analytical Skills: Spreadsheet, SQL, Python, Google Analytics, Mixpanel

EDUCATION & Certification

North Maharashtra University **Dhule, MH**

Bachelor of Engineering in Mechanical *(2015-2018)*

- HelloPM - Certification in Product Management
- AWS Certified Solution Architect- Associate
- HashiCorp Certified - Terraform associate
